Corps decreases water releases from Canyon Lake for routine inspection

The U.S. Army Corps of Engineers, Fort Worth District, will decrease water releases from Canyon Lake on Tuesday, June 25, to conduct a routine inspection of the dam.

For approximately three hours on Tuesday morning (8:30-11:30 a.m.), the Corps will close the gates at Canyon Dam to conduct an annual inspection of the dam's outlet works and flood conduit. The Corps inspects its dams annually to ensure all are in good working condition.

Because of the short time period involved, the Corps expects this action will have minimal impacts to recreation downstream of the dam.

For more information, call the lake office at 830-964-3341.
